Warehouse near Warsaw for lease

GLP Warsaw II Logistics Centre is a modern logistics park located just three minutes from the borders of Warsaw, directly by the S8 expressway interchange (Wypędy). The complex offers 32,000 m² of state-of-the-art warehouse space, with individual units starting from 4,700 m². Its proximity to the capital and only a 15-minute drive to Chopin Airport make it an ideal base for both domestic and international distribution operations

Modern operational space

The warehouse facility has been designed to accommodate advanced logistics and production operations. With a clear height of 12 metres and 11 loading docks, the centre enables efficient goods handling and smooth logistics flow. The modern infrastructure and flexible layout allow tenants to tailor the space to their operational needs, ensuring maximum performance and efficiency.

Comprehensive solutions for logistics

The investment offers advanced warehouse space complemented by fully functional office facilities that support the management of logistics and production processes. Additionally, the property provides comfortable working conditions and technological solutions that help optimise daily business operations. It is a professional business environment that combines high infrastructural standards with a practical approach to tenant needs.
