## GLP Łódź II Logistics Centre – logistics heart of Poland

GLP Łódź II Logistics Centre is an advanced logistics facility located in the very heart of Poland, near the S14 expressway. Its location in the Łódź region ensures fast access to Warsaw, Katowice, and the Tri-City area, enabling efficient distribution across Poland and Central Europe. The facility is situated in an area with a strong labour market and well-developed industrial infrastructure, making it an attractive destination for investors. This project combines a strategic location, high technical standards, and modern solutions that support sustainable growth.

## Infrastructure designed for efficiency and growth

The GLP Łódź II Logistics Centre has been designed with maximum operational flexibility and comfort in mind. High technical specifications, excellent build quality, and energy-efficient solutions enable smooth logistics and production processes. The centre is fully equipped to handle large volumes of goods while ensuring optimal space utilisation. It offers an ideal environment for companies seeking a reliable base for their growing operations.

## Sustainability and high-quality management

GLP Łódź II (West) meets the requirements of the BREEAM certification, confirming the ecological and energy-efficient nature of the investment. The facility benefits from GLP's top-tier property management standards, ensuring reliability and efficiency in daily operations. This is an investment that combines functionality, sustainable construction, and professional operational support – a benchmark for modern logistics in the Polish market.
