

Committed to
a **clean energy**
future

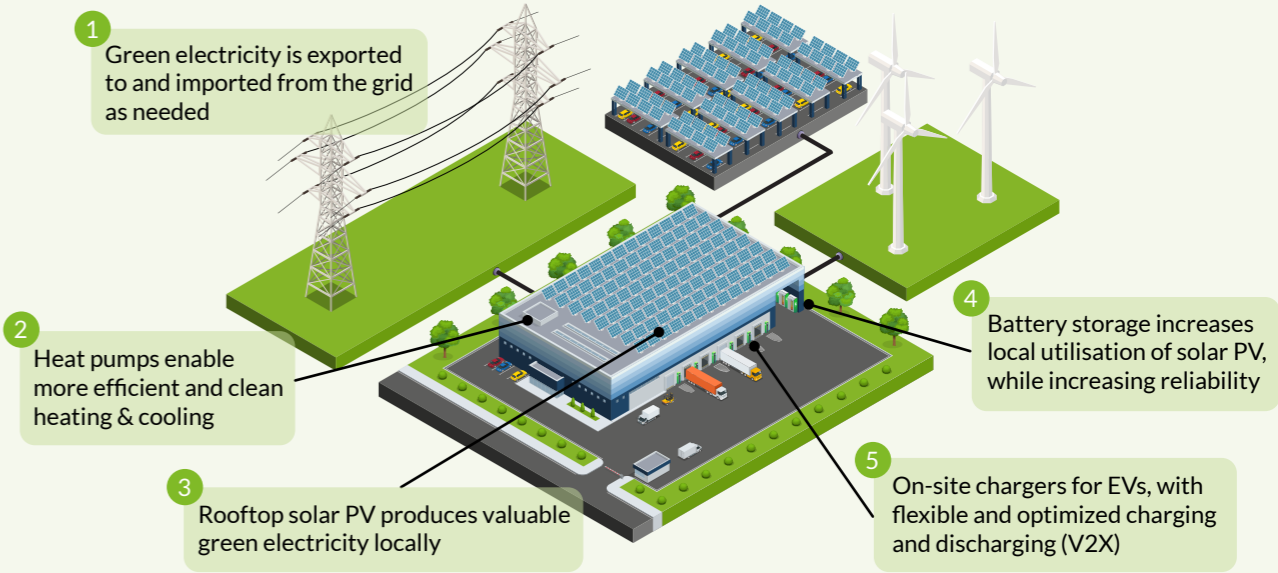

Accelerating the **clean energy** transition for our customers

GLP has launched a number of initiatives to offer renewable energy solutions on our **global logistics real estate portfolio**, including rooftop solar, wind assets and energy storage solutions.

To date, **GLP has installed over 700 MW of solar rooftops globally** which can generate **~540 Gigawatt hours (GWh)** annually which is equivalent to the annual electricity demand to **power ~2.1M homes**.

GLP Europe's ecosystem of renewable energy solutions enables customers to **reduce costs** and **carbon footprint**, while **increasing reliability**

Our existing growing rooftop and ground-mounted solar PV portfolio is targeted to **reach 2GW capacity by 2024**. In addition, GLP is set to create an exciting holistic ecosystem of solutions across the entire renewable energy value chain, including **1GW+ of planned wind assets by 2024** and **10TWh+ planned Electric Vehicle charging network**.

In Europe, regulatory action, intensive corporate decarbonisation and electrification of industry has created an attractive backdrop to execute **GLP's pan-European proprietary solar PV pipeline** with a **potential of 500MW** in the coming years.

GLP CAPITAL PARTNERS

GLP investments and assets are managed exclusively by GLP Capital Partners, a global alternative asset manager. This partnership gives GLP an **advantage to operate arm-in-arm with a platinum standard investment manager** with a rich operator history.

GLP Capital Partners is **focussed on fast-growing new economy sectors**, the same sectors where GLP is building businesses and operating assets, **all designed for a sustainable future.**

GLP Capital Partners has a proven **10-year track record of investing in both renewable assets and leading clean energy platforms.**

GLP Capital Partners established a solar joint venture with Brookfield Asset Management with a **solar joint venture platform**; has a **joint venture with CATL**, a **leading global battery manufacturer** and finally, **collaborate with YKC**, a leading Electric Vehicle charging network provider.

Meet the **GLP Clean Energy** team

GLP has assembled a highly experienced and dedicated team to lead this important programme.

Stefano Fissolo - Senior Director, is responsible for leading GLP's onsite renewable energy business by deploying rooftop solar, battery storage, electric vehicle infrastructure and other cleantech applications.

Manuel Gallio - Director, Asset Management, is responsible for managing GLP Clean Energy's portfolio of assets throughout their life cycle, managing technical and ESG due diligence, driving the adoption of best practices and new technologies.

Pablo Martinez - Director, Business Development, is focused on originating and developing renewables projects and creating the offering suite of onsite and offsite power purchase agreements for GLP Clean Energy customers.

Tobias Christaller - Vice President, Investments, is responsible for executing and forming GLP Clean Energy's investment and financing strategies.

Servando Tirado - Investment Associate is responsible for supporting the team on all investments and related activities

An aerial photograph of a large-scale rooftop solar installation. The roof is covered with rows of dark blue solar panels. In the center, there is a complex of white and red electrical equipment, likely inverters and transformers, with various cables and conduits. A small orange utility vehicle is visible on the right side of the roof. A green semi-transparent box with white text is overlaid on the top right of the image.

Our ecosystem of renewable energy solutions addresses the growing and imperative needs of our customers to access clean energy.
